20	GINGKO	Gingko biloba	41	HYBRID BLACK POPLAR	Populus robusta
21	DAWN REDWOOD	Metasequoia glyptostroboides			

We hope that you enjoy finding the specimen trees we have identified.
There are, in some cases, other specimens of these trees which you hopefully can find.
All trees marked on the map overleaf have a small black label attached to them,
about 2 metres above the ground, with its identifying number and names.

Further information about each tree is on our website: www.lakemeadows.org.uk
All proceeds from this leaflet will be used to make further improvements in the park.
